

Cover Letter - Web Developer (Full Stack)

Dear Hiring Team,

I am excited to apply for the Web Developer (Full Stack) position at eternal.ag. As a B.Tech IT graduate with hands-on experience in React.js, Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, AWS, Docker, and third-party API integrations, I am eager to contribute to your mission of building fully autonomous food production systems. Through my projects and internship experience, I have built full-stack applications, developed scalable backend services, integrated external APIs and webhooks, designed databases, and deployed applications using modern development practices. I enjoy owning features end-to-end, from implementation and testing to deployment and maintenance. What particularly motivates me about eternal.ag is the opportunity to use technology to solve meaningful global challenges. The combination of automation, sustainability, and real-world impact strongly aligns with my interests as a software developer. I am confident that my technical skills, problem-solving mindset, and willingness to learn would allow me to contribute effectively to your engineering team.

Short Note

I am passionate about building web products that solve real-world problems and create measurable impact. eternal.ag's mission to improve global food production through automation and technology is inspiring, and I would be excited to contribute my full-stack development skills while continuing to learn and grow.
