

Cover Letter – Node.js Developer

Dear Hiring Manager,

I am writing to express my interest in the Node.js Developer position. As a B.Tech IT graduate with hands-on experience in JavaScript, Node.js, Express.js, React.js, REST API development, MongoDB, PostgreSQL, and MySQL, I am excited about the opportunity to contribute to your engineering team. Through academic projects, internships, and personal development work, I have built full-stack web applications, designed and integrated RESTful APIs, implemented authentication systems, and worked with cloud technologies including AWS and Docker. These experiences have strengthened my understanding of scalable backend development, database design, asynchronous programming, API integrations, and application performance optimization. I am particularly interested in this opportunity because it closely matches my technical skills and career goals. I enjoy solving real-world problems, writing clean and maintainable code, collaborating with teams, and continuously improving my knowledge of modern backend technologies. I believe my technical foundation, project experience, and strong learning mindset would allow me to contribute effectively to your team. I would welcome the opportunity to discuss how my skills can support your organization's objectives. Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Akash Krishna M
